

Country/Regional Perceptions $\hat{=}$ Perspectives

Regional collaboration

- Exchange of experiences between countries
- Regional hubs
- Capacity building

LDN Monitoring and support to achieving targets

- Complementary information for reporting
(carbon sequestration, carbon mapping, mapping land use)

Landscape approach

- Consider on-site and off-site impacts
- Scaling out SLM practices
- Water management
- Soil management vs. Land management

Integrated Land Use Planning

- Strengthen inter-disciplinary approach
- Consider socio-economics of farm households
- Investment plans, incentive mechanisms

Mainstreaming SLM

- Institutionalize the work on SLM away from timebound projects
- Enhance cross-sectoral collaboration (line ministries, UNCCD focal points)
- Creating synergies (with other conventions, IPCC, IPBES, ...)
